

Workshop on "High energy photon collisions at the LHC"

Wednesday, 23 April 2008

Heavy ions and ultraperipheral nucleus-nucleus collisions (11:50 - 16:55)

time	[id] title	presenter
11:50	[7] Photon-induced collisions with nuclei at RHIC and the LHC	STRIKMAN, Mark
12:30	lunch break	
13:30	[13] Exclusive photoproduction results in ultra-peripheral collisions in STAR	GRUBE, Boris
13:55	[14] J/Psi photoproduction and exclusive dileptons in PHENIX	WHITE, Sebastian
14:20	[10] Photon-photon processes in ultra-peripheral nucleus-nucleus collisions	GUCLU, Cem
14:45	Coffee break	
15:15	[9] Exchange of high and low energy photons in ultraperipheral relativistic heavy-ion collisions	BAUR, Gerhard
15:40	[8] Diffractive photoproduction of Z0 bosons in coherent interactions at the LHC	MACHADO, Magno
16:05	[11] Upsilon photoproduction and exclusive dileptons in Pb-Pb at 5.5 TeV in CMS	SALAR, Vineet
16:30	[12] Photon-induced physics with heavy-ion beams in ALICE	NYSTRAND, Joakim
